m-card: 1:1 template

Print at 100 % ("actual size", no fit to page). Check the bars: each must measure exactly 50 mm.
Shown as the FM-1's back with its cover off (parts up). Cut on the middle of the thick line.

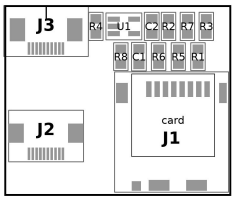

50 mm across

50 mm down

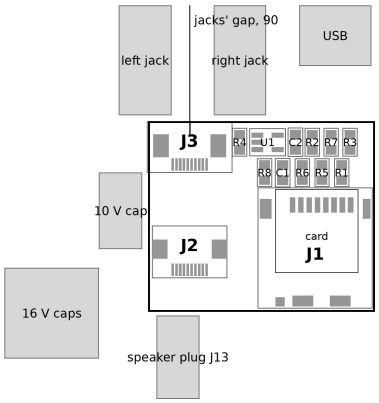

A: cut out, lay in the FM-1

left edge 84.5 mm from the FM-1's left edge; bottom edge 51.5 mm up
the tick on the top edge: J3's middle, at the jacks' gap (90)

B: spare (plain)

C: where it should sit (from the photo, +-1 mm; don't cut)

Measure (mm, with your 1 mm ruler to the half mm)

1. The 10 V capacitor's right side, from the FM-1's left edge (expected 83.7; the board's edge 84.5)

_____

2. The 10 V capacitor's top, from the FM-1's bottom edge (expected 69.9)

_____

3. The left jack's right side / the right jack's left side (expected 87.6 / 93.2: the gap's middle 90)

_____

4. The jacks' lower end, from the bottom edge (expected 76.8; the board's top 76.7)

_____

5. The speaker plug's top, from the bottom edge (expected 51.0; the board's bottom 51.5)

_____

6. Room above the socket for its lid to open (about 14 mm up, hinged at the bottom edge)?

_____

7. Template A in place: clear of the 10 V cap, J13 and the jacks? The LCD cable reaches J3's tick?

_____
